

The Courthouse, Horseferry Road

The Courthouse is a luxury apartment development by Barratt Homes. Located in London it is one of the most exclusive addresses in the city, with some property values reaching circa £3million.

CGL worked with HLM Architects to provide our Hook on Rainscreen system in aluminium, anodised in anolok 541 to produce a dynamic contrast to the building's existing stonework. The façade also incorporated an exclusive fin design.

Contact us for more information about the CGL Hook on Rainscreen and find out how it can be used for your next project.
