

Eurocentral

The CGL Traypanel System was used for the Eurocentral project that included 10 office buildings between Glasgow and Edinburgh. Pre-painted aluminium panels were used for the development which is the largest Scottish commercial building project to be completed in the last five years. The painted cladding is lightweight, weather resistant and available in a range of different shades and colours.

Contact us for more information about the pre-painted aluminium CGL Traypanel System and find out how it can be used for your next project.
