

## The Goldsmiths Centre

TECU Brass cladding was used for the exterior of the building at Green Park Reading. This particular Rainscreen System was constructed from a copper alloy that is intentionally left untreated to develop its own unique finish. The alloy can be used for a range of different applications and offers excellent abrasion and corrosion resistance.

Contact us for more information about the TECU Brass CGL Rainscreen System and find out how it can be used for your next project.

System – CGL Rainscreen System  
 Project Name – The Goldsmith Centre  
 Material – 1.5mm Tecu Brass  
 Supplier – KME  
 Contractor – Oskomera, London  
 Architect – John Lyall Architects, London
