

Beal High School

Beal High School in Ilford, Essex is a brand new mixed community school, which caters for pupils aged from 11 to 18.

CGL Facades Alucobond ACM in Traypanel in stunning Spectra Midnight Copper was chosen for the feature facia panels, which provides a great contrast to the predominantly white-painted school buildings. The Architect wanted to create a distinctive feature which incorporated many curved panels, providing an interesting challenge from a manufacture point of view. CGL Facades and Merson Group designed, manufactured and installed the panels for Morgan Sindall to give a really striking look.

Contact us for more information about the CGL Traypanel System and find out how it can be used for your next project.
