

## Coresham Street

Corsham Street is a high quality Student Accommodation building located just behind the iconic Old Street Roundabout in the fashionable Shoreditch area of East London. CGL Facades Perforated Aluminium Traypanel, post-coated in a vibrant white colour, was chosen for the upper levels while robust charcoal coloured brickwork at the base of the building gave the building a real contrasting look.

All the student rooms have private amenities, with a cafe, teaching space and great roof gardens offering fantastic views over the city. In addition to the manufacture, all installation of the Traypanel was performed by us drawing from the extensive installation experience of our parent company Merson Group.

Contact us for more information about the CGL Traypanel System and find out how it can be used for your next project.

System – CGL Traypanel System

Project Name – Corsham Street

Material – Post-coated perforated Aluminium

Contractor – Merson Group

Architect – Stephen Marshall Architects
