

## Derby Velodrome

Derby Velodrome is a multi-use arena and cycling velodrome, designed by architecture firm Faulkner Browns. This extremely striking building features CGL Facades' anodised shingles, installed in landscape format and incorporating a flowing wrap-around pattern. The shingles were supplied in four different finishes - Anolok 541, Silver 100A, Regency Gold 2 and Regency Gold 3 - to create a dynamic surface break-up effect, further lending to this building's unique appearance. This highly energetic design is a fitting look and perfectly matches the building's function.

Contact us for more information about the CGL Shingles System and find out how it can be used for your next project.
