

## ONSLow HOUSE

Onslow House is a state of the art commercial building located in the heart of Guildford. It has recently undergone an extensive redevelopment which included two additional floors being added, turning it into a five story, highly prominent office space stretching over 90,000 sq ft.

Our Copper Wallplank System was used on the external canopies as well as the internal lobby areas of this instantly recognisable building. The internal cladding had a post lacquer finish applied to stop the copper from weathering. Three separate colours were used which were provided by Aurubis in Finland including Nordic Standard, Nordic Brown and Nordic Light Brown. The Copper worked perfectly in this building, creating a mirroring effect which added to the sense of space by bouncing light around the large glass atrium.

Contact us for more information about the CGL Wallplank System and find out how it can be used for your next project.
